

Extra Facets (EF)

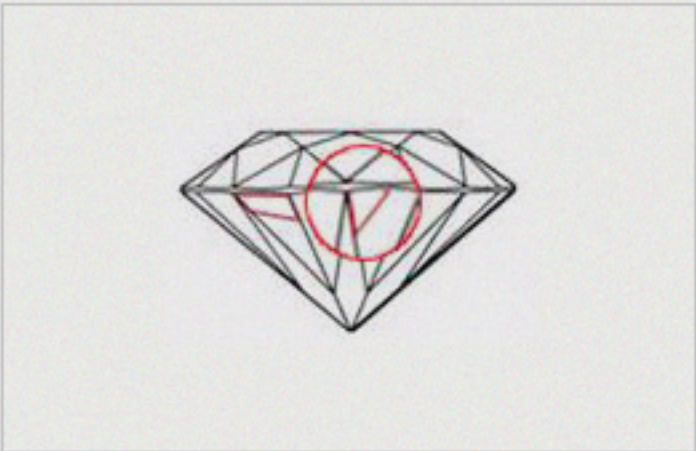

Occasionally a cutter will find the need to remove an inclusion near the surface or to compensate for facets which do not meet correctly and he will add an "extra facet". Extra facets have no effect on clarity grades. This is subdivided in Two parts : 01) EFCR : Extra Facets on Crown, 02) EFPV : Extra Facets on Pavilion.

Extra Facets on Crown (EFCR)

| CODE | DESCRIPTION | IMAGE |
|------------------|--|--|
| NV - NOT VISIBLE | Very difficult to find the extra facet on crown. It is not visible on crown. | Two diamond diagrams showing the crown and pavilion. Red circles are placed on the crown facets, but no extra facets are visible. |
| MN – MINOR | Difficult to find extra facet on crown. It is slightly visible on crown with 10x magnification | Two diamond diagrams showing the crown and pavilion. Red circles are placed on the crown facets, highlighting small extra facets. |
| MD – MEDIUM | Easy to find extra facet on crown. It is visible on crown with 10x magnification. | Two diamond diagrams showing the crown and pavilion. Red circles are placed on the crown facets, highlighting medium-sized extra facets. |
| MJ – MAJOR | Very easy to find extra facet on crown. It is easily visible on crown with 10x magnificationt | Two diamond diagrams showing the crown and pavilion. Red circles are placed on the crown facets, highlighting large extra facets. |

Extra Facets on Pavilion (EFPV)

| CODE | DESCRIPTION | IMAGE |
