

TABLE INCLUSION (TI)

To enhance our clarity grading we introduce a new factor i.e. Table Inclusion (TI). This can be Black or white inclusion on table in proportion to the clarity

CODE	DESCRIPTION	IMAGE
T0 - CENTER CLEAN	It doesn't have any inclusion in table.	
T1 - MINOR	This inclusion is not easily visible in table and it is dependent on the clarity grade.	
T2- MEDIUM	There is Slight presence of inclusion in table. It is partially visible and dependent on the clarity grade.	
T3 - MAJOR	They are moderately included in table. It is visible and dependent on the clarity grade.	
T4 - HEAVY	Inclusion is found in abundance in table. It is easily visible and dependant on the clarity grade. It affects the pricing of the diamond extensively.	

These ratings are dependent on the maximum inclusions for every diamond in each clarity grade and are visible with 10X magnification.
